

SAVE
WATER & ENERGY,
WITH OUR
ECO FREINDLY PRODUCTS.

Water in words is easy to flow but
impossible to Recollect.

ABOUT US

Our Company is driven towards encourage developing Innovative products especially in Environmental conservation products and make it commercialisation. We believe in identifying the technology need in these areas. We are a young and enthusiastic team of Innovators who has passion towards Technology. We want to mark our foot prints on Technology development towards Environment conservation products first in India and later in the world.

COMPANY PROFILE

Many Inventions are going on in various Platforms for various applications in India. We want to mark our Inventions and bring Invented Products of Environment conservation products into commercialisation initially and we also interested to work on other sectors in future.

Our team is a combination of Technology and Innovation from varied disciplines. We come from different backgrounds and work collectively to bring more Innovative products. That helps us in understanding the needs of Products to be made in different sectors Viz.. Environment, agriculture, domestic and Industrial needs.

Our Business is in ethical always with a simple Tag line R&D – IPR – Commercialisation We are proudly announce that we are recognised as STARTUP under STARTUP INDIA Scheme In this process, we recently undersigned Licence from Inventor for patented Product “Automatic water level control unit” which saves more than **1 Lakh** litters of Underground water and equivalent of Power per Product/Year

COMMON SALIENT FEATURES

- It is first of kind and patent applied Inbuilt starter with Automatic water level control unit.
- Saves more than **1 Lakh** Its of underground Water and equivalent of Power by controlling overflow from the water Tank. (Depends on Tank & Motor capacity)
- Controls any type of Tanks with Single and Multiple Tanks
- General Electrician sufficient for Installation and maintenance, no professional require
- In this concept we can minimise the wire requirement from Controller to the Tank through Electro-Mechanical system
- Used for the Domestic ,Industrial, Hospitals, Marine/Ships , all municipalities and Offices of Govt & Pvt sectors etc., as like DOL & Sub-Mersible Starter
- In Industries, It can also controls for chemical tanks in addition to the Water tanks
- Works even in sea shore & moisture area's as this Electro-mechanical
- 100% safety as the control wires are not directly contacted with water/liquid, water/liquid Contact less

OUR PRODUCTS

Jalraksha Fully Automatic for Monoblock/ Jet Motors:

- ✓ World's first Inbuilt DOL starter with Auto ON & OFF, No need of external controller unit
- ✓ Auto On & Off Motor when reached Low level of Water and maximum level of Water respectively
- ✓ Applicable for Domestic and Industrial purpose
- ✓ Low cost as they Invest for One unit for two purposes
- ✓ Motor safety with Fuse Protection
- ✓ High Durable and reliable with Electro-Mechanical System
- ✓ Easy to Install, Maintain and repair as Individual parts can be replaced.

Jalraksha Semi Automatic for Monoblock/ Jet Motors:

- ✓ World's first Inbuilt DOL starter with Auto OFF especially designed for Multiple Tanks, No need of external controller unit
- ✓ Automatically Switch OFF Motor when Water reached Low level and Shows Indication Whenever water reaches to minimum level
- ✓ Applicable for Domestic and Industrial purpose
- ✓ Low cost as they Invest for One unit for two purposes
- ✓ Motor safety with Fuse Protection
- ✓ High Durable and reliable with Electro-Mechanical System
- ✓ Easy to Install, Maintain and repair as Individual parts can be replaced.

Jalraksha Fully Automatic for Sub-Mersible Motors

- ✓ World's first Inbuilt starter with Auto controller, No need of external controller unit
- ✓ Auto On & Off Motor when reached Low level of Water and maximum level of Water respectively
- ✓ Suitable model for Domestic and Industrial purpose
- ✓ Low cost as they Invest for One unit for two purposes
- ✓ Easy to Install, Maintain and repair as Individual parts can be replaced.

Jalraksha Semi Automatic for Sub-Mersible Motors

- ✓ World's first Inbuilt starter with Auto controller, No need of external controller unit
- ✓ Auto Off Motor when reached maximum level and shows indication when reached to low level Water in the water tank.
- ✓ Suitable model for Domestic and Industrial purpose
- ✓ Low cost as they Invest for One unit for two purposes
- ✓ Easy to Install, Maintain and repair as Individual parts can be replaced.

Jalraksha Smart+:

- ✓ Auto On & Off Motor when reached Low level of Water and maximum level of Water respectively
- ✓ Suitable for Monoblock/Jet Motors and can be used as semi-automatic for Sub-Mersible motors for upto 8 Amps.
- ✓ Applicable for Domestic and Industrial purpose
- ✓ Low cost as they Invest for One unit for two purposes
- ✓ Motor safety with Fuse Protection
- ✓ High Durable and reliable with Electro-Mechanical System
